ECHOES Flash #4

3rd December 2015

ECHO has launched today in APPEL a **new release** of the Single Form including a revision of some sectors and subsectors.

You can find the list of new sectors and subsectors, in [English](#) and in [French](#), and the reason behind this modification.

If you need specific orientation on how to deal with such changes in your proposals for the HIP 2016, follow the instructions in [English](#) and in [French](#).

Some of your proposals **might have** to be adapted. However, considering the tight deadlines, ECHO (APPEL) will accept the proposals with the old set of sectors/subsectors, provided that a revised version containing the adaptations is submitted prior to the signature of the grant agreement.
